PROFESSIONAL SUMMARY

Creative Developer and Learner and B.Voc IT First Year student at Dr. Birinchi Kumar Barooah College (Dr. B.K.B. College), 2026 to Present. Passionate about building clean, responsive, and user-friendly web experiences while growing skills in modern web development. Focused on frontend development, UI implementation, and learning full-stack patterns through real GitHub projects. Based in Nagaon, Assam, open to internships and collaborative learning.

EDUCATION

B.Voc in Information Technology - First Year Student | 2026 - Present

Dr. Birinchi Kumar Barooah College (Dr. B.K.B. College), Assam, India

Currently pursuing B.Voc IT with focus on fundamentals of IT, web development, programming basics, and practical project building. Learning modern tools and building portfolio through hands-on GitHub projects.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js (learning), Responsive Design, UI Implementation, Bootstrap, Tailwind CSS basics

Programming Basics: JavaScript, TypeScript (basic), Git, REST API basics, Zod validation basics

Tools and Platforms: Git and GitHub, Vite, npm, VS Code, MongoDB Atlas (basic), Netlify and Vercel deployment, Chrome DevTools

Learning Areas: Next.js App Router, JWT Authentication (bcrypt and HTTP-only cookies), State Management, Cart and Checkout flows, Role-based access, Client-side filtering

PROJECTS

NexusMart - Full-Stack E-commerce Platform

Tech: Next.js, TypeScript, MongoDB, JWT | Link: github.com/Manashjyoti-Bora/nexusmart

- Built full-stack e-commerce using Next.js App Router, TypeScript, MongoDB Atlas
- Implemented JWT auth with bcrypt and HTTP-only cookies, cart and checkout logic
- Created role-gated admin panel, Zod validation on every mutation
- Applied CI with typecheck, lint and build pipeline

DevHire Pro ATS - Job Portal and Applicant Tracking UI

Tech: React 19, Vite, UI Design | Link: github.com/Manashjyoti-Bora/devhire-pro-ats

- Designed job portal UI with real-time multi-attribute filtering (role, stack, salary, location)
- Implemented glassmorphic light and dark themes using CSS variables end to end
- Built application pipeline tracker: Applied to Screening to Interview to Assessment to Offer
- Demonstrated complex UI state design and progressive disclosure patterns as a learning project

TaskFlow Enterprise - Kanban Productivity App

Tech: React, Kanban, CRUD | Link: github.com/Manashjyoti-Bora/taskflow-enterprise

- Created Kanban productivity app with dynamic boards, live priority tagging and sprint tracking
- Used React with modern state management, component-per-column architecture
- Implemented CRUD with optimistic UI updates, memoized lists and keyed renders
- Optimized for smooth interaction on budget devices

Personal Portfolio - This Website

Tech: HTML, CSS, JS, GSAP, AOS, SEO | Link: github.com/Manashjyoti-Bora/portfolio

- Designed and developed premium responsive personal portfolio with 100 percent personal data
- Implemented animations with GSAP and AOS, custom cursor, offcanvas menu, and SEO optimization
- Showcases real projects, education, skills, and ATS resume with responsive design

ADDITIONAL INFORMATION
